

There were lots of happy faces onboard the sold-out sunset cruise of Lake Mendota on the "Betty Lou".

## Lake Mendota Cruise

The group learned a lot about Lake Mendota—from invasive species to eutrophication to the effects of climate change and some history to boot! Our tutors were Dr. Jack Walsh (UW-Center for Limnology) and Don Sanford (our captain).

Chris Hittinger, UW Genetics, talked about the critical role of yeasts in the brewing industry as well as in drug and biofuel production.

Chris described his research on yeasts—its history, chemistry, biology, genetics, music, and

of course ethanol. There was plenty of beer accompanied by lots of good food.

## Yeast and Lager

### Science on Tap

Sponsored by Mirus Bio, cosponsored by the ACS Wisconsin Local Section Nick Rossi, organizer.

Mirus plans a similar event, but on the UW campus. All Local Section members will be invited.

## Earth Day 2018

Members from the Boys & Girls Club celebrating Earth Day 2018 with activities around the theme, "Dive into Marine Chemistry".

## 2017 BANQUET

Conversational groups at the Social Hour portion of the 2017 Annual Meeting and Awards Banquet.
